SUMMARY

Senior UX/Product Designer with over 5 years of experience in crafting intuitive digital experiences, scalable design systems, and conversational AI solutions. Proven ability to translate user needs and product marketing insights into production-ready features that drive double-digit revenue lift, improve operational efficiency, and strengthen retention and adoption. Adept with modern development tools, accessibility standards, and Lean Methodologies across ERP-driven, AI-enabled products, driving user-centered design and process improvements.

EDUCATION

Indiana University-Indianapolis | US

08/2023 - 05/2025

Master's | Human Computer Interaction (HCI)

EXPERIENCE

Service & Ops UX Lead | La Bodega | Calhoun, GA

02/2026

- Spearheaded the development and launch of a loyalty and CRM system, replacing manual coupons with trackable rewards and weekly campaigns, reducing discount exposure from 0.29% to 0.09% of sales and contributing to a 13% revenue lift.
- Designed and shipped Lola, a bilingual WhatsApp shopping assistant and staff dashboard that transformed one-way weekly deal outreach into guided flows for specials, store hours, pickup orders, and seamless handoff, improving customer engagement and facilitating Journey Maps.
- Architected WhatsApp CRM campaigns with behavioral nudges and launched Lola Card, a promotional gift card offer, increasing weekly rewards redemption by 20% and supporting repeat visits, acquisition.
- Led the design and build of a mobile-first, bilingual internal operations PWA for La Bodega, translating complex cross-role workflows into a role-based MVP for shift control, daily management, approvals, and vendor coordination, enhancing operational efficiency through Process Improvements.
- Designed an internal decision-support dashboard combining competitor benchmarks across seven major U.S. metros, market signals, and sales forecasts to support planning and promotion decisions, leveraging product marketing insights and framing capabilities, informed by Quantitative Analysis.

UX Engineer | Code19 Racing | Indianapolis, IN

09/2024 - 12/2025

- Engineered and scaled an enterprise design system comprising 30+ components and 100+ tokens, unifying commerce application UX and aligning product design with business objectives through visual hierarchy and content strategy.
- Increased user retention by 66% and reduced bounce rate by 36.5% by redesigning CMS UX with HCI informed by UX research and Lean Methodologies.
- Developed UX strategy and information architecture redesign through extensive field research and 20+ stakeholder interviews, aligning product design with user personas and business objectives, incorporating Emerging Technologies.
- Redesigned real-time HMI dashboards for AI output visualization, improving driver response time by 30% through NLU integration and incorporating accessibility standards.
- Designed conversational UI flows and safety guardrails for an NLP driving assistant, reducing user friction and streamlining task completion.

UX Designer | Scaling Nature | Finland

05/2024 - 06/2024

- Enhanced product discovery and decision-making for 30 B2B/SaaS clients by designing end-to-end UI patterns and prioritizing recommendations through heuristic UX audits and market analysis, supported by product marketing strategies and Journey Maps.
- Reduced solution risk and accelerated prototype transformation into viable features by leading cross-functional engineering co-creation sessions and user flows, utilizing Agile methodologies.
- Led recurring stakeholder reviews for 2+ clients to define success metrics and align expectations with technical constraints, reducing rework through effective communication and inclusive design practices using Lean Methodologies.

UX Designer | Make It Digitel | Kerala, India

08/2021 - 08/2023

- Led iterative UX design across digital channels, resulting in a 47% increase in conversions and a 32% rise in satisfaction through research-driven usability enhancements and User-Centered Design.
- Drove a 15% increase in product adoption by synthesizing insights from over 25 user surveys to inform design changes and onboarding improvements, utilizing Process Improvements.
- Elevated design quality and stakeholder alignment by developing detailed wireframes, prototypes, and information architecture in Figma, facilitating cross-functional workshops to validate UX solutions, incorporating typography considerations and adhering to WCAG guidelines, utilizing Sketch and Invision.

Motion Designer | Sprazzo | Kerala, India

11/2019 - 06/2021

- Created motion design assets that drove brand alignment and operational goals by integrating user research, digital strategy, and cross-functional collaboration using Adobe Creative Cloud, emphasizing Design And Prototyping.
- Delivered consistent, high-quality motion design assets within a diverse product ecosystem, ensuring visual consistency and adherence to design guidelines, supporting quantitative analysis through visual impact.
