Professional Summary

Senior Product Designer with 5+ years combining mixed-method research, systems thinking, and interaction design to ship AI-enabled, operational, and customer-facing products. Translates field research, behavioral data, and ambiguous business problems into validated workflows, scalable systems, and production-ready interfaces. Strengths include conversational UX, service design, accessibility, and design-engineering collaboration.

Professional Experience

Service & Operations UX Lead

Feb 2026 – Present

La Bodega, Calhoun, GA

- Partnered with store leaders, frontline employees, and customers through interviews, observation, service mapping, and workflow validation, translating operational friction into shipped improvements across shopping, ordering, loyalty, and staff operations.
- Led the end-to-end design of a loyalty and CRM system that replaced manual coupons with trackable rewards and campaigns, reducing discount exposure from 0.29% to 0.09% of sales and contributing to a 13% revenue lift.
- Designed and shipped Lola, a bilingual WhatsApp shopping assistant and staff handoff experience for product discovery, store information, and pickup orders, enabling 96.3% of conversations to close without staff escalation.
- Designed and built a mobile-first operations PWA with role-based workflows for shift management, approvals, daily operations, and vendor coordination.
- Created decision-support tools that combined customer behavior, competitor benchmarks, market signals, and sales forecasts to support merchandising and promotional decisions.

UX Engineer

Sep 2024 – Dec 2025

Code19 Racing, Indianapolis, IN

- Led field research, information-architecture redesign, and more than 20 stakeholder interviews to align user needs with business objectives, increasing retention by 66% and reducing bounce rate by 36.5%.
- Designed real-time HMI dashboards that translated AI outputs and telemetry into clear, actionable interfaces, improving driver response time by 30%.
- Shaped conversational flows, explanation patterns, and safety guardrails for Maveric AI, an NLP-powered driving assistant that communicated complex autonomy data in natural language.
- Built and scaled an enterprise design system with more than 30 components and 100 design tokens, improving consistency and accelerating design-to-engineering handoff.

UX Designer

May 2024 – Jun 2024

Scaling Nature, Finland

- Enhanced product discovery and decision-making for roughly 30 B2B/SaaS clients through heuristic audits, workflow analysis, and journey mapping, and led recurring stakeholder reviews to align on success metrics and reduce rework.

UX Designer

Aug 2021 – Aug 2023

Make It Digitel, Kerala, India

- Synthesized insights from 25+ user surveys into onboarding and design changes that lifted product adoption 15%, and led iterative UX design across digital channels that drove a 47% increase in conversions.

Education

Master of Science, Human-Computer Interaction (HCI)

Aug 2023 – May 2025

Indiana University-Indianapolis

Bachelor of Science, Civil Engineering

2017 – 2021

PRIST University, India

Skills

Product and UX: Product Design, Interaction Design, Information Architecture, User Flows, Journey Mapping, Service Design, Conversational UX, Inclusive Design, Accessibility and WCAG

Research: Stakeholder Interviews, Field Research, Contextual Observation, User Surveys, Usability Evaluation, Heuristic Evaluation, Research Synthesis, Mixed-Method Research

Systems and Craft: Design Systems, Component Libraries, Prototyping, Visual Design, Typography, Motion and Micro-interactions, Figma, Adobe Creative Cloud

Technical and Delivery: Developer Handoff, HTML, CSS, JavaScript, React
